CNP and CP Payments

CNP and CP Payments:

The Dejavoo QD2 is integrated with linked2pay and linked2invoice to enable merchants to accept multiple payment options seamlessly. Customers can choose card or alternative payment methods at the point of interaction, helping merchants streamline collections, improve transparency, and add flexibility across their in-person and invoice-based payments.

Seamless Transactions

By delivering a seamless Dejavoo QD2 payment experience, linked2pay and linked2invoice enable fast, secure transactions that reduce friction, improve acceptance, and give merchants a smooth, reliable way to collect payments across channels.

Dejavoo (QD2) is integrated with both linked2pay and linked2invoice

Secure Gateway

Utilizing the linked2pay gateway and a QD2 delivers of enterprise-grade security with advanced encryption, tokenization, and built-in compliance controls, protecting sensitive payment data while reducing risk for partners and merchants.

Included in White Label

The Dejavoo integration is included in a paycosmos white label, enabling our partners to offer branded, turnkey payments with seamless transactions, unified reporting, and faster go-to-market without added development or integration complexity.

Next Steps

The next step for an ISO with a paycosmos white-label is to review the integration help section in their portal so that they can offer merchants a CNP and CP payment solution that expands reach and drives added revenue.

paycosmos is focused on providing our partners with white-labeled, compliant payment solutions that expand merchant reach, increase revenue, and simplify ongoing support.
